

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) An electrode for a fuel cell comprising:
a gas diffusion layer; and
a catalyst layer formed over said gas diffusion layer;
wherein said catalyst layer comprises a first carbon particle having a hydrophilic surface,
a catalytic metal supported on said first carbon particle, an ion exchange resin and a second
carbon particle; and
a surface of said second carbon particle is water-repellent.
2. (Original) The electrode for a fuel cell as set forth in Claim 1, wherein an average
value of lattice spacing of the [002] plane, d_{002} , of said second carbon particle is not less than
0.337nm but not greater than 0.348nm.
3. (Original) The electrode for a fuel cell as set forth in Claim 1, wherein a
crystallite size in a direction of c-axis, $L_c(002)$, of said second carbon particle is not less than
3nm but not greater than 18nm.
4. (Original) The electrode for a fuel cell as set forth in Claim 2, wherein a
crystallite size in a direction of c-axis, $L_c(002)$, of said second carbon particle is not less than
3nm but not greater than 18nm.
5. (Original) The electrode for a fuel cell as set forth in Claim 1, wherein said gas
diffusion layer also includes said first carbon particle and said second carbon particle.

6. (Original) The electrode for a fuel cell as set forth in Claim 2, wherein said gas diffusion layer also includes said first carbon particle and said second carbon particle.

7. (Original) The electrode for a fuel cell as set forth in Claim 3, wherein said gas diffusion layer also includes said first carbon particle and said second carbon particle.

8. (Original) The electrode for a fuel cell as set forth in Claim 4, wherein said gas diffusion layer also includes said first carbon particle and said second carbon particle.

9. (Original) A fuel cell comprising:
an electrode for a fuel cell on fuel supply side;
an electrode for a fuel cell on oxygen supply side; and
a solid polymer electrolyte membrane placed between said electrodes;
wherein at least said electrode for a fuel cell on oxygen supply side is said electrode for a fuel cell as set forth in Claim 1.

10. (Original) A fuel cell comprising:
an electrode for a fuel cell on fuel supply side;
an electrode for a fuel cell on oxygen supply side; and
a solid polymer electrolyte membrane placed between said electrodes;
wherein at least said electrode for a fuel cell on oxygen supply side is said electrode for a fuel cell as set forth in Claim 2.

11. (Original) A fuel cell comprising:
an electrode for a fuel cell on fuel supply side;
an electrode for a fuel cell on oxygen supply side; and
a solid polymer electrolyte membrane placed between said electrodes;
wherein at least said electrode for a fuel cell on oxygen supply side is said electrode for a
fuel cell as set forth in Claim 3.

12. (Original) A fuel cell comprising:
an electrode for a fuel cell on fuel supply side;
an electrode for a fuel cell on oxygen supply side; and
a solid polymer electrolyte membrane placed between said electrodes;
wherein at least said electrode for a fuel cell on oxygen supply side is said electrode for a
fuel cell as set forth in Claim 4.

13. (Original) A fuel cell comprising:
an electrode for a fuel cell on fuel supply side;
an electrode for a fuel cell on oxygen supply side; and
a solid polymer electrolyte membrane placed between said electrodes;
wherein at least said electrode for a fuel cell on oxygen supply side is said electrode for a
fuel cell as set forth in Claim 5.

14. (Original) A fuel cell comprising:
an electrode for a fuel cell on fuel supply side;

an electrode for a fuel cell on oxygen supply side; and
a solid polymer electrolyte membrane placed between said electrodes;
wherein at least said electrode for a fuel cell on oxygen supply side is said electrode for a
fuel cell as set forth in Claim 6.

15. (Original) A fuel cell comprising:
an electrode for a fuel cell on fuel supply side;
an electrode for a fuel cell on oxygen supply side; and
a solid polymer electrolyte membrane placed between said electrodes;
wherein at least said electrode for a fuel cell on oxygen supply side is said electrode for a
fuel cell as set forth in Claim 7.

16. (Original) A fuel cell comprising:
an electrode for a fuel cell on fuel supply side;
an electrode for a fuel cell on oxygen supply side; and
a solid polymer electrolyte membrane placed between said electrodes;
wherein at least said electrode for a fuel cell on oxygen supply side is said electrode for a
fuel cell as set forth in Claim 8.
